

SAVE THE DATE (S) !

2021 European Energy Transition Conference in Dunkirk - LAST CHANCE to take part in the drawing up of the programme!

CLOSURE OF THE CALL FOR CONTRIBUTIONS: 17 JULY, 5 P.M.

From 12 to 14 January 2021 the next edition of the European Energy Transition Conference – the annual appointment for the local European players committed to energy transition and adaptation to climate change – will be held in Dunkirk.

As they do every year, the co-organizers – the Dunkirk Urban Community, Bordeaux Métropole, Greater Geneva and ADEME, have launched a call for contributions to co-construct the general workshop programme. Whether you are elected representatives, citizens, businesses, researchers, university dons, industrialists or again technicians, do not hesitate to submit your contribution proposals for the workshop programme to the website www.assises-energie.net, **by 5 p.m. on 17 July at the latest.**

ACTEE

ACTEE 2 (Action of the Local Authorities for Energy Efficiency) Programme - Launch of call for expression of interest in the financing of the energy renovation of council buildings!

OPENING OF APPLICATIONS: 1ST JULY

Preparing the move into action for the energy renovation of its public buildings? This is the purpose of the ACTEE (Action of the Local Authorities for Energy Efficiency) Programme! Owned by the FNCCR, it aims to help finance the actions of the local authorities: recruitment of flow controllers, purchase of metering tools, setting in place of audits and a multi-annual investment strategy, purchase of monitoring software, etc. With a total amount of €100 M, 90 % of which is directly redistributed to the local authorities, this funding is accessible via a response to the calls for expression of interest (AMIs),

the next of which is being launched at the beginning of July for council buildings (schools, town halls, community halls, etc.).

In order to apply, all you have to do is emphasize two aspects: pooling, by grouping several local authorities together (no standard model is imposed, it is up to you to indicate what level seems to be the most relevant given the characteristics of your area) and the long-term approach with a good rate of implementation.
